# ChargeBack 911 – Banking and Financial Domain

## Objectives

Banking and financial domain requires us to host our applications on a robust and compliant platform.

## Challenge

Large databases and interconnected applications posed a challenge for us manage a clean and non-disruptive migration.

## Results

Azure Migrate allowed the Windows VM workloads and SQL workloads to be migrated with ease. Active DR Site also implemented using ASR.

**“Serving BFSI requires you to cater to so many compliances and certifications, Azure provides a robust platform for the same”**

**Chandra**  
IT Manager
