

# Cloudfonee – App Modernization

Cloudfonee platform helps customers in managing the Cloud environment is a more efficient way. It allow bringing in Automations and Optimizations to the customer Cloud Landscape

# Cloudegenee – App Modernization

## Objectives

Banking and financial domain requires us to host our applications on a robust and compliant platform.

## Challenge

Large databases and interconnected applications posed a challenge for us manage a clean and non-disruptive migration.

## Results

Services when migrated to Azure serverless compute helped in delivering value to the customer in terms of better performance, zero downtime, cost efficiency.

**“Serving BFSI requires you to cater to so many compliances and certifications, Azure provides a robust platform for the same”**
